

**Parquet:** Service animal owner must have an aisle seat so animal can sit in aisle.

**Parquet Circle ADA sections:** service animal owner should, **if possible**, have a seat at access end of row, for same reason> so animal is not positioned between the other ADA Wheelchairs and/or companions.

**Parquet Boxes:** there is no extra space in any Parquet Boxes, if Box is fully occupied. There is barely room for occupants to enter the box without moving a chair aside to enter.

**Once any Parquet or Balcony box has full occupancy, there is no room for a service animal in any Boxes.** Also, there is a step down into Boxes, so they are not ADA compliant.

**Balcony level ADA (Sections C/D):** have a tiny bit more “wiggle room” perhaps for one service animal- but not much- when ADA zone is fully occupied.
