

Although the auditorium seating areas do NOT have electric outlets, there are electric outlets outside the auditorium seating area, on baseboard of MAIN LEVEL AMBULATORY, noted below:

"ambu" is AMBULATORY/ hallway before you enter theatre seating areas

= (ambu baseboard between Doors 5-6)

Behind Parquet Circle, Section E

*Easy access for patrons in
Parquet Circle Sections D, E, F

= (ambu baseboard of Door #3)

Behind Parquet Circle, Section C

= (ambu baseboard at Door #9-10)

Behind Parquet Circle, Section I

Since these outlets are not inside the auditorium seating area, constant connection to electric source would not be possible so please discuss that with patrons.

* I have never known an oxygen tank that needs to remain in an outlet, usually they plug in for recharge during intermission.
